Esna is name of innovation in the transportation sector!

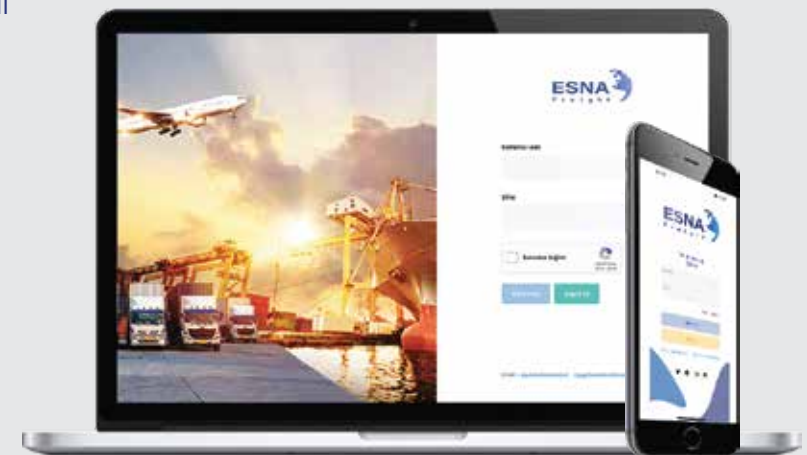

'Esna Web System' artificial intelligence platform is with you...

ESNA provides you with live information in all tracking processes with its own digital portals and increases your operational efficiency with continuously developed software systems.

We provide end-to-end automation by using smart software systems in all processes from pre-order pricing to customer/buyer delivery.

With both booking speed and a successful operation rating of +99.5%, Esna offers continuous innovation to its customers thanks to its digitalized and constantly renewed artificial intelligence management strategy.

Cargo Tracking System

01 **Departure Tracking**

02 **Arrival Tracking**

03 **Transit Time Tracking**

04 **Cargo Delivery Tracking**

05 **Mail / Mobile Notification**

From the first movement of your shipment/cargo to the final delivery process, we try to prevent cargo arrival delays and realize safe delivery by regularly tracking and informing the cargo and taking timely actions when necessary.

You can also track your cargo and create your feedbacks by logging in to our website or mobile application.

Mission

Our mission is to always get to know you better and seek the best solution for your needs. Thanks to our active and successful logistics network around the world, we always work solution-oriented in order to fulfill the demands and goals of our valued customers and to meet all your logistics needs

Vision

Our vision is to be your leading solution partner in transportation, a vital link in supply chain management.

Our Targets

ESNA's targets are to:

- Transport our customers' products at optimum costs in line with their delivery dates and to offer them a wide range of logistics solutions
- Provide value-added services to industrial and other organizations in their operational processes
- Be a preferred partner in our industry based on the trust of our customers, employees and business partners.

Unique Boutique Service

Special Services

Thanks to the special service agreements it has made with the world's leading carriers, ESNA provides opportunities for its customers to expand their trade volumes.

Playing a leading role especially in the industry and food sectors, the Company provides significant advantages to its customers in loadings of other sectors.

Strong Operation

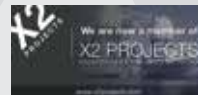

Carrying out all of its operational transactions in a safe manner and in accordance with the loading quality, the Company provides 'local transportation, lashing and securing' services to its customers in all destinations around the world.

'Esna Web System' Artificial Intelligence Platform

Offering you live information in all tracking processes with its own digital portals, the Platform increases operational efficiency thanks to constantly developed software systems.

Global Network Memberships

Thanks to its Global memberships, ESNA has a valid network in all commercial operation centers around the world. In this way, it provides access to target supplier / consignee for all its customers and offers additional advantages such as commercial activity, operational efficiency and safe logistics service to alternative destinations

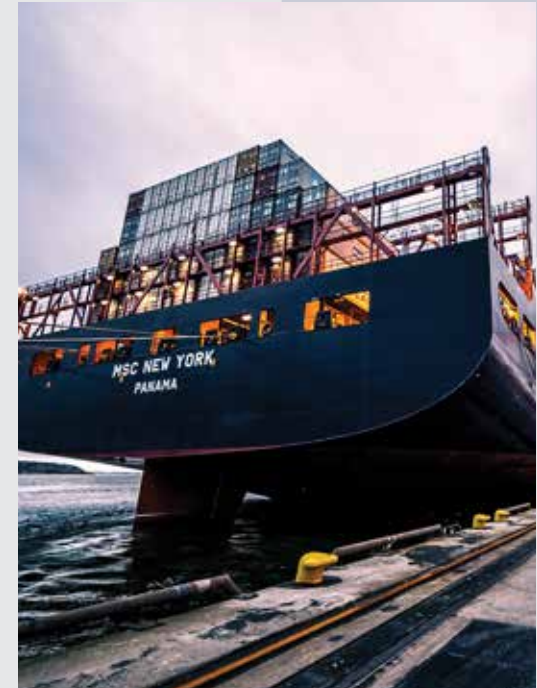

True Boutique Service

ESNA thinks like you and works like you. It always reminds you of its difference with its 7x24 service understanding.

Esna Fast Delivery Service (EFDS) offers 'important document delivery service' to its customers located in Istanbul with its own courier team. It also provides an operational advantage by making the fastest and safest physical/digital delivery of documents such as bills of lading, Delivery Order, certificates, invoices, etc.

ESNA CHARTERING

Our company provides an exclusive chartering service for dry & bulk cargoes, project cargoes and other related transportation needs.

By utilizing our GLOBAL and extensive network of experience in the transportation sector, we offer our customers a wide range of possibilities thanks to our strong relationships with shipowners and other ship brokers

In addition to full and partial charters, time and voyage charters, we provide optimal support and solutions for all chartering requirements, including contract transportation.

As in all transportation and logistics services, we ensure high customer satisfaction by working quickly and solution-oriented with our competence, reliability and experience in ship chartering solutions.

ESNA CUSTOMS CLEARANCE

Our group, which has adopted the principle of providing quality service and logistics support to exporter-importer companies in all branches of foreign trade with its service quality, experienced staff, modern technological equipment and contemporary business understanding in the sector, provides services in accordance with the Customs Law No. 4458

Our company, which maintains its reputation in the sector, knows that it is of great importance to maintain mutual trust with our customers with its specialized staff. In addition, it is aware of its responsibility and shows sensitivity to the use of the rights of its customers and the use of time.

With its professional staff who have the knowledge of the legislation required by the Customs Consultancy profession, Esna is responsible for providing the most accurate and best service with the awareness that its work does not only consist of the withdrawal of the goods from customs by constantly following and applying the changes in legal regulations.

Esna, with its liaison offices (partner companies) located in customs areas, is present in all customs where foreign trade is carried out in our country.
